## Résumé

## 1 MkDocs LaTeX Plugin

This Plugin uses behind-the-scenes TeXSmith to convert your MkDocs documentation into a beautiful PDF document.

### 1.1 Features

- Convert your entire MkDocs site into a single PDF file.
- Support for custom LaTeX templates.
- Automatic handling of images and links.
- Configurable options for page size, margins, and fonts.

### 1.2 Installation

To install the MkDocs LaTeX Plugin, use pip :

```
pip install mkdocs-latex
```
